

Leupold RX-IV Rangefinder

The RX-IV rangefinder features an electronic compass and even an inclinometer.

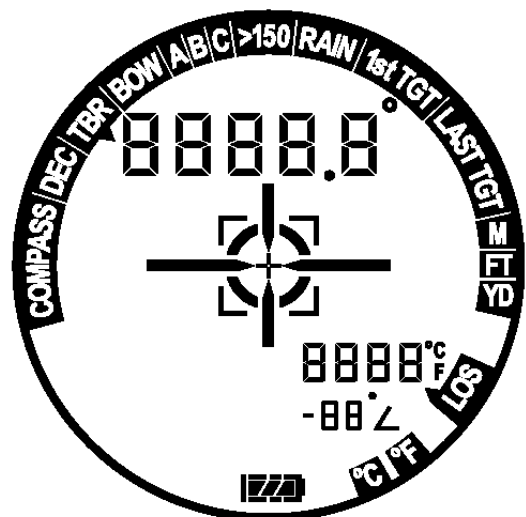

Distance, compass bearing and slope, all in one display

Multiple Modes

With the RX Series you can use multiple modes at once to tailor your readings to the conditions. For example you can use Rain Mode and 1st Target Mode at the same time to achieve the most accurate range possible. Leupold's exclusive Quick Set Rotary Menu™ is intuitive and easy to use.

- **A precision magnetic inductor compass** in Compass Mode displays the reading in large numbers.
- **Declination Setting** corrects the usual compass error between magnetic north and true north.
- **Compass Tilt Compensation** uses the inclinometer to provide correct compass readings up to a 30° viewing angle. Most electronic compasses must be held level.
- **Long Range Mode** gives range to distant targets rather than objects closer than 135 meters (e.g. trees).
- **Rain Mode** filters out the laser's shorter "rain" readings for true downrange accuracy.
- **1st Target Mode** displays the distance of the closest object when more than one object may be read.
- **Last Target Mode** displays the distance of the farthest object when more than one object may be read. Ignores brush, even close to the target.
- **Measurements in feet, yards, or meters.**
- **Line of Sight Distance** gives you the straight line distance to the target.
- **One-handed controls.**
- **Clicking fast-focus eyepiece** for quick adjustments.
- **Celsius/Fahrenheit temperature readings.**
- **Incredibly accurate ranging** and close range measurement down to three meters.
- **Battery power indicator** keeps you on top of your battery level at all times.
- **Rugged, waterproof, lightweight, and compact design** is built specifically for hunting. The rubber body armor comfortably fits your hand for a secure grip in all weather conditions.

QUICK SET ROTARY MENU™

- **Accessories included:** Useful carrying case with dog clip and internal pocket, battery, tripod thread.

Specifications

Model name	RX™-IV
Finish-	Black/Grey or Mossy Oak® Brush™
Rubber armor	Fully Armoured - Waterproof
Magnification	8x Monocular
Field of view	10 m at 100 meter (4.5°)
Maximum range	1350 m (Reflective Target); 800 m (Tree)
Minimum range	3 meter
Measuring accuracy	1 meter
Inclinometer	Yes – displayed in Bow and Ballistic range mode
TBR™ (True ballistic range™)	Yes (Bow and Rifle mode)
Compass w / Declination Setting	Yes
Compass w/ Tilt compensation	Yes
Thermometer °C & F	Yes
Long Range Mode	Yes (over 135m)
1st Target Mode	Yes
Last Target Mode	Yes
Rain Mode	Yes
Scan Mode	Yes
Illuminated Backlit	Yes
Waterproof	Yes
Warranty	2 Years

Weight	340 g
Length	119 mm
Objective Ø	28 mm
Main tube Ø	160 mm
Eye relief	35 mm
Exit pupil Ø	3.5 mm
Twilight factor	150 Match
Reticle	13 Reticle System
Battery Life	2000 shots
